Data Analyst with 8+ years of experience applying statistical analysis, SQL, Python, and business intelligence to financial, insurance, and marketing data. Master's-trained statistician with expertise in data transformation, predictive modeling, risk analysis, A/B testing, and data visualization. Proven track record of automating processes, improving reporting efficiency, and translating complex data into actionable business insights.

TECHNICAL SKILLS

Programming & Analytics

SQL, R, VBA, Python: Pandas, Seaborn, Matplotlib, NumPy, Scikit-learn (sklearn)

Business Intelligence & Visualization

Power BI, DAX, Power Query, Tableau, Advanced Excel

Statistical & Analytical Methods

Exploratory Data Analysis, Predictive Analytics, Forecasting, Hypothesis Testing, A/B Testing, Statistical Modeling, Risk Analysis

Data and Cloud Platforms

Azure, AWS, BigQuery (GCP)

WORK EXPERIENCE

Marketing Analyst – Park Media (Remote)

2026 - Present

- Improved conversion rates by up to 5% by analyzing user engagement, website behavior, and revenue data to identify optimization opportunities
- Increased reporting accuracy and reduced reporting workloads by up to 5 hours per week by synchronizing disparate data pipelines, automating data flows and eliminating manual data exports
- Centralized data with ETL/ELT tool to pull raw data from scattered sources (APIs, databases, and apps) into a unified cloud data warehouse
- Designed and analyzed A/B tests evaluating website layouts, promotions, and user-experience changes to identify opportunities to improve conversion rates
- Developed Power BI and Tableau dashboards to visualize performance metrics, trends, and actionable business insights
- Optimized website performance across page speed, SEO, user experience, and conversion using a data-driven approach

Group Benefits Underwriting Analyst – Equitable Life (Waterloo)

2021 - 2026

- Developed and deployed Power Apps automation that reduced manual processing time by 50% and saved approximately 10 hours per week
- Analyzed large datasets containing 200,000+ records and developed risk models to support group benefits underwriting and pricing decisions

- Provided analytical and risk-based decision support to sales teams for 100+ policies annually, balancing competitive pricing with underwriting requirements
- Improved an underwriting workflow used by 4 analysts, reducing average processing time by 25%
- Analyzed and assessed risk for 1,000+ group benefits proposals annually, representing \$20 million in annual premiums and 20,000 insured group members

Business Intelligence Data Analyst – Deloitte (Kitchener)

2018 - 2020

- Wrote SQL queries to extract, join, transform, and reconcile financial and operational data from multiple source systems
- Identified and resolved inventory discrepancies across product categories, reducing financial reporting discrepancies and associated costs
- Cleaned and transformed unstructured datasets containing 1M+ records using Python and statistical techniques, addressing missing data, categorical encoding, outliers, and class imbalance
- Performed data validation, exploratory data analysis, and feature engineering using Python and SQL to improve analytical accuracy
- Supported data warehousing and migration activities across analytical projects, including data validation and reconciliation
- Collaborated with 10-person data engineering and data science teams to resolve data-quality issues and support analytical projects
- Automated data preparation and reporting workflows, reducing report-generation time by 25% and saving approximately 8 hours per month

Associate Analyst – MacDonald Dettwiler & Associates (Toronto)

2015 - 2016

- Built Power BI dashboards consolidating data across regions, reducing monthly reporting time by 2 hours
- Analyzed and consolidated data from multiple regional sources to identify trends, discrepancies, and reporting gaps, supporting more accurate management reporting

EDUCATION

University of Waterloo – Waterloo, Ontario

- Master of Mathematics (Statistics) – Quantitative Finance **2018**
- Bachelor of Mathematics (Honours) – Mathematical Economics **2015**

ADDITIONAL INFORMATION

- Languages: English, Intermediate French (strong reading/writing proficiency)
- Microsoft PL-300 Certification
