Data Analyst with 8+ years of experience applying statistical analysis, SQL, Python, and business intelligence to financial, insurance, and marketing data. Master's-trained statistician with expertise in data transformation, predictive modeling, risk analysis, A/B testing, and data visualization. Proven ability to reduce reporting workloads by 5–10 hours weekly, improve conversion rates through experimentation, and build scalable data pipelines and dashboards that drive business decisions.

TECHNICAL SKILLS

Programming & Data

Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib), SQL, R, VBA

Business Intelligence

Power BI (DAX, Power Query), Tableau, Advanced Excel

Data Engineering & Cloud

ETL/ELT pipelines, APIs, Azure, AWS, BigQuery

Statistical & Modeling

Predictive Modeling, Forecasting, Hypothesis Testing, A/B Testing, Risk Modeling

WORK EXPERIENCE

Marketing Analyst – Park Media (Remote)

Feb 2026 – Present

- Improved conversion rates by 3.5% by analyzing user engagement and running A/B tests using Python and SQL
- Automated reporting pipelines using ETL tools and Power BI, reducing manual workloads by 4-5 hours weekly
- Built churn-prediction analyses identifying behavioral and financial drivers of cancellations, improving retention insights for marketing teams
- Centralized data with ETL/ELT tool to pull raw data from scattered sources (APIs, databases, and apps) into a unified cloud data warehouse
- Designed and analyzed A/B tests evaluating website layouts, promotions, and user-experience changes to identify opportunities to improve conversion rates
- Experiment design – randomization, sample-size calculation, significance testing (Python, statsmodels, SQL, BI dashboards)
- Developed Power BI and Tableau dashboards to visualize performance metrics, trends, and actionable business insights

Group Underwriting Analyst – Equitable Life (Waterloo)

Aug 2020 – Nov 2026

- Developed and deployed Power Apps automation that reduced manual processing time by 50% and saved approximately 10 hours per week

- Analyzed large datasets containing 200,000+ records and developed risk models to support group benefits underwriting and pricing decisions
- Provided analytical and risk-based decision support to sales teams for 100+ policies annually, balancing competitive pricing with underwriting requirements
- Improved an underwriting workflow used by 4 analysts, reducing average processing time by 25%
- Analyzed and assessed risk for 1,000+ group benefits proposals annually, representing \$20 million in annual premiums and 20,000 insured group members

Business Intelligence Data Analyst – Deloitte (Kitchener) Sept 2018 – Feb 2020

- Wrote SQL queries to extract, join, transform, and reconcile financial and operational data from multiple source systems
- Identified and resolved inventory discrepancies across product categories, reducing financial reporting discrepancies and associated costs
- Cleaned and transformed unstructured datasets containing 1M+ records using Python and statistical techniques, addressing missing data, categorical encoding, outliers, and class imbalance
- Collaborated with product teams to build robust star-schema data marts using dbt, relying on Airflow to trigger immediate transformations following successful Fivetran replication cycles
- Performed data validation, exploratory data analysis, and feature engineering using Python and SQL to improve analytical accuracy
- Supported data warehousing and migration activities across analytical projects, including data validation and reconciliation
- Collaborated with 10-person data engineering and data science teams to resolve data-quality issues and support analytical projects
- Automated data preparation and reporting workflows, reducing report-generation time by 25% and saving approximately 8 hours per month

Associate Analyst – MacDonald Dettwiler (Toronto) May 2015 – Sept 2016

- Built Power BI dashboards consolidating data across regions, reducing monthly reporting time by 2 hours
- Analyzed and consolidated data from multiple regional sources to identify trends, discrepancies, and reporting gaps, supporting more accurate management reporting

EDUCATION

University of Waterloo – Waterloo, Ontario

- Master of Mathematics (Statistics) – Quantitative Finance **2017 – 2018**
- Bachelor of Mathematics (Honours) – Mathematical Economics **2010 – 2015**

ADDITIONAL INFORMATION

- Languages: English, Intermediate French (strong reading/writing proficiency)
- Microsoft PL-300 Certification
